PrognoCIS EHR

PrognoCIS provides customizable templates that allow physicians to tailor their workflow in accordance with their specific needs and requirements. Through dynamic features like Patient Portal, Medical Billing, RCM, and e-Prescription, PrognoCIS streamlines and simplifies the execution of tasks and processes in a physician's practice.

Compatible across all devices, other dynamic and powerful solutions offered by PrognoCIS include Practice Management, Telemedicine, Medical e-faxing, and texting.

It would be a pleasure to demonstrate how our software could streamline your workflow and enhance patient care.

Electronic health record (EHR) software from PrognoCIS offers a customizable workflow designed for your practice. PrognoCIS EHR also offers medical billing services, telemedicine with custom mobile apps, integrated patient payments, and more.

Customizable EHR workflow

Your choice of cloud or local server and based

Scalable from single physician clinics to large multi-location and specialty

Interoperable with your eRx, PACs and lab connectivity

Mature product with 10+ years of EHR performance

Time-proven implementation methods for a successful EHR transition

“ Our practice has been using PrognoCIS since 2008. They are forward-thinking and have the tools in place for any upcoming changes for CMS, Meaningful Use, Telemedicine, etc... They have created customized reports and templates for us, a referral tracking system and many other helpful tools. I can't imagine using any other EHR!”

- Lisa Kent
